PRO-ACTIVE PARENTING

what is the need

There are no perfect parents. Just as a coin has two sides, every parent has weaknesses that go together with strengths.

A progressive parenting is more important than a quality school behind success of a child. The role of parents cannot be ignored when it comes to shaping-out moral values, discipline, essential social skills and other behavioral aspects of the child. Great parents always make sure that their child inculcates values of integrity, self-awareness, and respect and goal orientation.

Our education system helps us to create a well-filled mind however what we need to be ahead of the curve is a well-formed mind. A well-formed mind helps us to comprehend better, analyses better and implement better.

The Shinx way of parenting always believes in creating “great parents”, as we all know great parents are made not born. Here we help the parent’s to raise independent, happy, and healthy children. As a result they learn right values and right values leads to creating a “future-fit” individual.
